About

Senior Web Developer with 10+ years shipping production web apps, including 4 years at WegoPro on B2B travel and expense at scale. Specialized in Vue/Nuxt, React/Next, and TypeScript across SaaS, DeFi, and design systems. Led framework migrations, architected modular monolith front-ends, owned technical direction, and drove cross-functional delivery with product and design. Focused on developer experience, performance, and code quality.

Experience

Web Developer

WegoPro – Full-time Remote

(Mar 2022 – Apr 2026)

- Led Nuxt 2 → Nuxt 4 migration using Vue 3 web components as bridge layer.
- Designed modular monolith frontend architecture adopted team-wide.
- Led code review process and mentored teammates on Vue 3 patterns.
- Owned technical direction and best practices for the frontend team.

Front-end Web Developer

BlockDevs – Full-time, Ho Chi Minh City, VN

(Jun 2019 – Jan 2022)

- Led development of Multiplier liquidity protocol platform (successor of PawnHub).
- Architected SuperLauncher, a decentralized crowdfunding and staking platform.
- Built cross-platform Vue wallet module.
- Led onboarding, mentoring, and code reviews for new team members.
- Conducted technical interviews for team recruitment.

Front-end Web Developer

Motorist.sg – Full-time, Ho Chi Minh City, VN

(Dec 2017 – Jun 2019)

- Developed new company landing page and back-office platform.
- Led platform migration to Nuxt.js v2.
- Maintained and enhanced platform functionality.

Front-end Web Developer

Letterink – Full-time, Ho Chi Minh City, VN

(Mar 2016 – Dec 2017)

- Managed and maintained client WordPress and Adobe Muse websites.
- Developed and implemented company website.
- Resolved technical issues and provided website support.

Freelance Web Developer

(Mar 2013 – Dec 2016)

- Built and maintained custom CMS websites and landing pages.
- Optimized WordPress sites for SEO and performance.
- Managed ongoing website updates and maintenance for clients.

Key Projects

WegoPro (formerly known as Travelstop)

(Mar 2022 – Present)

- **Platform:** B2B Platform for corporate travel and expense
- **Role:** Web Developer
- **Contributions:**
 - Led shipping of main features: recent bookings, policy change indicators, hierarchy approvals, custom fields, onboarding flow and the entire back-office dashboard.
 - Cleaned up legacy modules through refactors and bug fixes.
 - Migrating main web app from Nuxt 2 to Vue 3 SPA, and solo-migrated the back-office dashboard to Nuxt 4 + Nuxt UI.
 - Kept team moving through code reviews, pairing, and shared docs.
 - Owned UI consistency across new and legacy parts of the platform.
 - Worked closely with design and PM to turn specs into shipped features.
 - Pushed for better front-end practices and tooling across the team.
 - Handled production issues and quick fixes when stuff broke.
- **Tech stacks:** Javascript, Nuxt.js v2.x, Nuxt-18n, Buefy, Vuetify, TailwindCSS, ESLint, Jest, Cypress, Stylus, SCSS, Serverless, AWS, Stripe, EJS/ETA (email templates), Figma, Zeplin, Phrase.

Multiplier.finance (formerly known as Pawnhub)

(2013 – 2016)

- **Platform:** Liquidity protocol, Multi-Chain Lend (like AAVE)
- **Role:** Front-end Web Developer.
- **Contributions:**
 - Led migration from Vue v2.x Class-based syntax to Vue v3.x Composition API.
 - Developed core features including lending, wallet integration, and staking.
 - Maintained platform stability and resolved UI issues.
 - Conducted code reviews and facilitated knowledge sharing among team members.
- **Tech stacks:** Vue v2.x, Vue v3.x, Antd, Vuetify, TailwindCSS/UnoCSS, ESLint, SCSS, Figma, AdobeXD, WalletConnect, Web3.js, Ethers.js, Vue-18n, Wallet integration (MetaMask, TrustWallet, Safepal, Solflare, Onto), bignumber.js, cleave.js, dayjs, iconify, ESLint.

SuperLauncher

(Feb 2020 – Jan 2022)

- **Platform:** IDO, Staking, Marketplace blockchain platform.
- **Role:** Core member, Front-end Web Developer
- **Contributions:**
 - Built platform architecture from scratch.
 - Developed custom blockchain wallet module for Vue v3.x.
 - Contributed to WalletConnect open-source project through bug fixes.
 - Maintained platform stability and resolved UI issues.
 - Conducted code reviews and maintained code quality standards.
- **Tech stacks:** Typescript, Vite, Vue v3.x, UnoCSS, Figma, AdobeXD, WalletConnect, Web3.js, Ethers.js, Vue-18n, ElementUI, Wallet integration (MetaMask, TrustWallet, Safepal, Solflare, Onto), bignumber.js, cleave.js, dayjs, iconify, ESLint.

Education

Ton Duc Thang University, HCMC – Vietnam

(2013 – 2016)

Computational and Applied Mathematics, Bachelor program (incomplete, left in 3rd year)
